* Excludes compressors, heat exchangers and obsolete parts.

Did You Know?

- Many air conditioners are over or under charged by 10 to 20%.
- An air conditioner that is 10% under charged uses 20% more electricity.
- Apple Heating & Cooling technicians are NATE (North American Technician Excellence) certified.

Properly Maintained Equipment

- *Uses less energy* – saving you money!
- *Lasts longer* – saving you money!
- *Is safer* – protecting you and your family
- *Has fewer repairs* – saving you money!
- *Breaks down less* – it's keeping you comfortable when you need it.
- *Works better* – provides you with more comfort

Your Satisfaction Is Guaranteed

You may cancel your membership at any time and receive a 100% refund of unused portion of your dues.

Lower Utility Bills

At Apple Heating & Cooling we know that you rely on your heating system to keep you warm during our cold Northeast Ohio winters and your cooling system to keep you cool and dry in the muggy summer heat.

We know that comfort systems need regular maintenance to keep them running at peak efficiency, and you avoid the inconvenience of equipment breakdowns – especially during severe weather. Did you know that over 90% of the emergency calls we run could have been avoided with proper maintenance?

Your comfort system will use less energy-**saving you money** – when you have annual maintenance performed by a trained HVAC professional. And you will be more comfortable. Properly maintained systems work better, break down less and use less energy.

And because our Precision Tune-ups include a complete check of your system, you will have the **Peace of Mind** of knowing your system has been serviced by a pro – a pro who will check all the safety controls on your equipment and will check for Carbon Monoxide.

More Peace of Mind

Every Apple Heating & Cooling **DISCOUNT CLUB** service agreement includes annual maintenance of your comfort equipment:

Gas Furnace

- test carbon monoxide levels
- clean burners, adjust as needed
- inspect heat exchanger
- clean pilot assembly or flame sensor
- test and adjust safety controls
- inspect flue pipe and vent system
- check draft
- check thermostat operation
- check blower and motor operation
- check gas pressure and adjust
- change standard air filter (filter not included)
- lubricate all moving parts as needed

Oil Furnace

- test carbon monoxide levels
- remove and replace nozzle, sharpen electrodes
- clean heat exchanger with soot vac
- test & adjust safety controls
- inspect flue pipe and vent system
- check thermostat operation
- check draft and perform combustion analysis
- change standard (general) fuel filter
- check blower and motor operation
- change standard air filter (filter not included)
- lubricate all moving parts as needed

Gas or Oil Boiler *all on the furnace list that apply plus:*

- check all zone valves & thermostats
- check expansion tank
- check circulator
- check fill valve
- check low water cutoff if present
- check sight glass if present

Air Conditioner / Heat Pump

- check temperature drop on indoor coil
- check refrigerant charge
- check thermostat operation
- check blower and motor operation
- clean outdoor coil
- check & clean condensate drain
- change standard air filter (filter not included)
- clean indoor coil

Discounts and Such
